SPECIAL PLANS

Here at Omafin Corporation, we have listened to the requests of thousands of customers to create long term plans that help investors trade/amass profits over a long period of time. There are two (2) special plans and they are explained below

SAVINGS PLAN

In this plan, customers are able to trade for hundred (100) days consecutively and for a higher profit percentage too and lower withdrawal charges. The minimum amount to subscribe to the savings plan is Ten thousand dollars (\$10,000) and the daily ROI on the savings plan is 2.65%; illustrated below. This plan enables those who save or would like to save for an event, occasion, project etc. to plan and compound for a long period of time and we also give them a little extra profit for their patience and this is because when a trading bot recognizes a substantial amount in a customer's Trading wallet over a longer period of time, it is able to trade more efficiently and make greater profits over a longer period which is more efficient than halting/interrupting the trading process every six(6) days.

SAVINGS PLAN

\$10,000-\$25,000

2.65% ROI/100days

2.5% withdrawal fee

SHAREHOLDERS PLAN

The shareholder plan is also known as the 'Exclusive' plan. This plan offers you 0.1% of every new deposit that comes into the company daily as profit. Example: if there are 50 new deposits on Monday, this means that you'll earn $0.1\% \times 50 = 0.5\%$ of the total amount of ne deposits made on Monday. However, you need to understand that the number of ne deposits daily will not always be the same, sometimes lower and sometimes higher but may not affect the amount of money that comes into the company daily. This plan also stretches for a period of 31 days as opposed to the traditional 6 days on other plans.

You may want to know the amount of money that comes in as new deposit daily, we'll not give exact figure but this usually vary around \$1,000,000 - \$2,500,000(USD). This means that if the total amount of new deposits in a day sums up to \$1,000,000 from 50 people, you'll be earning only 0.5% of that figure on Monday which will be displayed on your dashboard and that'll be \$5,000. We currently have 1900+ active shareholders and about 5,800 people who have subscribed to the shareholder plan in total.

Also in this plan, investors are not allowed to withdraw initial capital of \$100,000 and above until after a period of 6 months, investors also must have their profits sent to them at the end of every month whether it is conducive for them to receive money at that moment or not. The company pays every shareholder's profit as a compulsory part of its operations. The shareholder plan has proven to be the most lucrative plan of all since its introduction in July 2021 but only a few investors can afford it at a go without having to first compound.

Thank you for choosing Omafina Corporation, we are here for you
